

Recreational Vehicles
Diesel Cooker

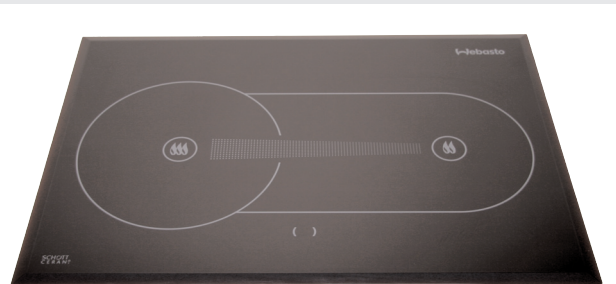

Cook safely and conveniently in your motorhome with the Webasto Diesel Cooker X100

In general, cooking in a motorhome means cooking with gas. However practical this is, it is questionable in terms of design, cleanliness, and safety. And what happens when the gas cylinder is empty? Webasto has the solution: The Webasto Diesel Cooker X100.

The heat source for this cooker is a diesel burner which is integrated into the cooker. This heats a CERAN® cooking surface which has room for two small pots or saucepans. Only the glass ceramic cooking surface is visible, and this is very robust and easy to care for, just like at home. Inside the van there is no longer an open flame, and the exhaust is led to the outside – in the same way as Webasto heaters.

The product benefits of the Webasto Diesel Cooker X100

- Suitable for all diesel-fuelled recreational vehicles
- Elegant design
- Very safe thanks to absence of open flames
- Easy to use by means of control unit with installation adaptability
- Easy to clean
- Low current and fuel consumption
- Low noise operation
- Exhaust exiting to the outside
- Hotplate displays residual heat
- High cooking power up to 1,900 Watt
- Even in the mountains it works dependably thanks to altitude compensation switch
- Robust, high-quality CERAN® cooking surface
- Rapid installation thanks to universal installation kit

Webasto Diesel Cooker X100

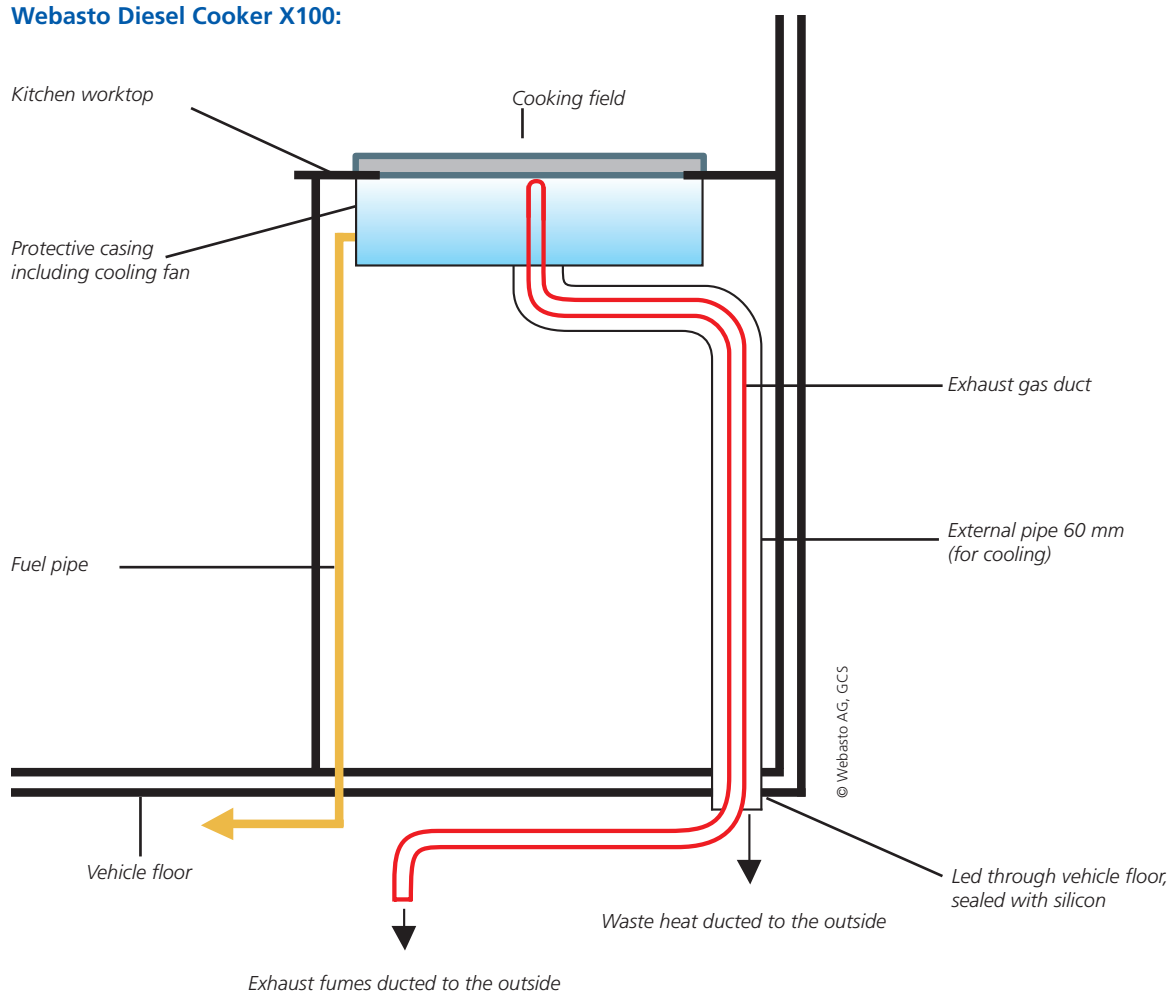

The elegant and clean solution to cooking in a motorhome. Simple to use, and quick to clean

The control unit

Easy to use, with infinitely variable temperature preset as well as an altitude switch for use in the mountains.

Installation diagram for the Webasto Diesel Cooker X100:

The cooker can be installed without difficulty in virtually all vehicles. The cooker is mounted from above into the recess in the kitchen worktop. A protective casing is fitted from below, and has an integrated cooling fan which ensures that the waste heat is ducted from the underside of the cooker to the outside via a flexible coaxial pipe.

Technical specifications for the Webasto Diesel Cooker X100:

Cooking power (W)	Voltage (V)	Fuel	Fuel consumption (l/h)	Power consumption (A)	Warm-up time	Dimensions L x W x H (mm) Ceran hotplate	Dimensions L x W x H (mm) Protective casing	Weight (kg)
900 - 1.900 (infinitely variable)	12	Diesel	0.09 - 0.19	0,3 A (3,6 Watt) max. when starting approx. 8 A for 4 min	~ 3 min	46 x 31 x 0.5	56 x 36 x 15 (2 cm Exhaust nozzle)	8 (Cooker unit) 1,5 (lower casing)
